

# Search Exercises

---

 [coursera.org/learn/unix/supplement/tHAaq/search-exercises](https://coursera.org/learn/unix/supplement/tHAaq/search-exercises)

---

1. Search states.txt and canada.txt for lines that contain the word “New”.
2. Make five text files containing the names of states that don’t contain one of each of the five vowels.
3. Download the GitHub repository for this book and find out how many .html files it contains.
